

JOURNEYS

2019-2020

4/27-5/1

MORNING MEETING

MS.LORELEI

This week we listened to a poem about propellers, and the students had a challenge to create a spinning top. We also had a joke day where students shared their funniest jokes! They were hilarious! We moved our bodies with yoga and learned a new can can chair dance!

Next week is our last week of school! Remember to let me know if you have a different address as stated in Brightwheel or will not be home on Thursday for our drive by!

PICTURING MATH STORYTIME

MS. LORELEI

We talked about tens this week. We read books like *Ten Red Apples* to understand counting by tens and parts of ten (two numbers that add up to equal 10). We learned how to make a ten frame out of an old egg carton and how to use a ten frame to help us understand parts of ten. We made a ten frame flash and students used their knowledge of ten frames to understand numbers within and beyond ten.
