

## JOURNEYS

2019-2020

4/20-4/24

## **MORNING MEETING**

MS.LORELEI

This week we learned what to do when a friend is sad, read books about spring and learned that this would be Ms. Rachel's last week with us. On Friday, we celebrated her by brainstorming words and phrases to finish the sentence "Rachel is..." Students took turns sharing their thoughts on Rachel and sharing any special messages for her. Rachel's time with us was so special. We wish you well!

Next week we will have a new one on one call schedule. Please make sure to sign up if you haven't yet.

## **PICTURING MATH STORYTIME**

MS. LORELEI

We continued our exploration of measurement. Then we built up understanding of place value and groups. We began by grouping and counting by fives. Then, we moved on to recording groups of 5, 6 and 10. We learned that a two digit number represents how many groups of 10 and ones are in a set. We also learned how to make a special bird feeder!

## **PASSION PROJECT**

MS. LORELEI, MS. RACHEL

Find your Passion Project resources here: [Class Code: ywtt 4o3](#)

This week was critique week. It seemed as if most students needed more time to complete projects. Next week projects can be shared with their educator.

## **EXPLORING NATURE**

MS. LORELEI, MS. RACHEL

Our students have a very diverse interest in nature! I have been taking personal requests every day on different animals and natural settings.

This week we learned about:

Rainbows, bats, caves, penguins, birds, whales, caves, wolves, and Yellowstone National Park.

I challenged students to write a poem about nature in their place. Karl wrote a lovely poem about sharks!

## **CLOSING CIRCLE**

MS. RACHEL

This was the last week we will have a closing circle. Thank you for gathering with us!
