

JOURNEYS

2019-2020

3/23 - 3/27

MORNING MEETING

MS.LORELEI

Welcome to the virtual semester! We are so excited to try out this new format in this current season of change. After a week of preparation, our educators were so excited to come together to see each little face we have been missing. Each morning, we met together on Google Meets to uphold our Morning Meeting rituals. This time also allowed for different focuses throughout the week to help guide offline time. One of these focuses was to create a rainbow to put in a window that includes the phrase: "Everything will be okay!" This trend has been spotted around the world as a marker of hope. Your rainbows were beautiful to see!

We also celebrated Charlie, who had a birthday on Sunday. Our class brainstormed different words to complete the sentence: "Charlie is..." Each child then selected a sentence to write for Charlie to create a class book about him.

PICTURING MATH STORYTIME

MS. LORELEI

This week we read a couple different books about counting, addition and subtraction. We spent a couple days exploring *Mission Addition* about Miss Prime's math class and the activities they do. Like in the story, we counted up the different pets we have at home to graph and compare. We also created our own math story problems. On another day, we read *Ten Sly Piranhas* and explored different ways to make ten using an illustration of a soup can by Andy Warhol.

LITERACY RESOURCES

MS. LORELEI, MS. RACHEL

Find your literacy resources here: Journeys Literacy Resources: [Class Code: bq6onay](#)

There are options for reading different leveled texts and responding or there are word building activities such as open word sorts or phonics activities.

MATH RESOURCES

MS. LORELEI, MS. RACHEL

Find your math resources here: Journeys Math Resources: [Class Code: e3ridrd](#)

This week students chose between different resources that helped build their number sense.

Some favorites were:

- Sums of 10 card game where students flipped over a number of cards and had to find two cards that added up to 10.
- Bump
- Writing a number line
- Learning even and odds

PASSION PROJECT

MS. LORELEI, MS. RACHEL

Find your Passion Project resources here: Class Code: [ywt403](#)

This week we met to learn about the Passion Project Timeline and learned how to create a driving question and topic about something we are passionate about.

Meetings whole group are every Monday at 11:00.

EXPLORING NATURE

MS. LORELEI, MS. RACHEL

This week students used their nature journals to get to know their environment. It is the beginning of Spring so students learned about signs of spring. Related videos were posted in the Nature Exploration classroom.

CLOSING CIRCLE

MS. RACHEL

This is the time of day where students get to share what they learned and their favorite part of the day! Little Fox adventures are also shared during this time!

This past week children took Little Fox on bike rides, visited the beach, played Pokemon, played video-games, read books, and more!

*Reminder: Your child has 1:1 check-ins with an educator every day unless you have requested a different schedule.
